We are a small, expanding, high-tech systems company in Biggleswade and have a requirement for engineers to work on a wide variety of embedded products and bespoke applications.

If you consider you:
- Are better than the rest,
- Want a broader challenge,
- Need more control over your projects,
- Want a wider variety of work,
-

Read on - This is the company for you.

We have four small divisions Custom Software Systems, Custom Broadcast Products, Custom Control & Automation and Custom WorldCLASS:: Software.

Our engineers are multi-disciplined and have a selection of skills from the following areas:
- Software engineering with OOD, C++, PC, WinNT, GUI, Communications, Networking, Multi-Media.
- Control engineering with MMI, Database, PLC, Automation experience,
- Electronics engineering with embedded systems, CAD, CPLD and low-level software experience.
- Project management with specifying, purchasing, training and commissioning.
